Jymberee

Personal Safety Platform · Android & iOS

Emergency SOS · Community Alerts

Help reaches you in seconds, not minutes.

Jymberee turns your phone into a personal safety network. One tap, a shake, or a spoken word sends your live location and a photo to your loved ones on WhatsApp, and alerts people nearby who can help.

Set up in under 2 minutes

Works in the background

OTP-verified accounts

One tap
A big SOS button, always one tap away

Shake
Shake your phone, even when it's locked

Voice
Say "Help me", "Help fire" and more

Earbuds
Trigger hands-free from your earbuds

HOW IT WORKS

From panic to help in three steps

1

Trigger SOS

Tap, shake, speak or use earbuds. Choose medical, fire, theft or assault, or just send.

2

Family is alerted

Your emergency contacts get a WhatsApp message with your address, map pin and photo.

3

Community responds

Jymberee users in your area get a push alert and can see where you are on the live map.

EVERYTHING IN ONE APP

Built for the moments that matter

Instant WhatsApp alerts

Contacts get your exact address, coordinates and a photo, with no app needed on their side.

Neighbourhood network

SOS alerts reach nearby users in the same area, so the closest help knows first.

Live safety map

See active alerts, hospitals and fire stations around you on one map.

Safety guides & first aid

First aid, fire safety, medical and crime-prevention tips, available whenever you need them.

Always-on protection

Background shake detection keeps working when the app is closed or the phone restarts.

Refer & earn

Invite friends and family, grow your circle of safety, and earn rewards for every referral.

Your safety net, always on.

Download Jymberee, add your emergency contacts, and you're protected in under two minutes.
